The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

DETAILED ACTION

1. It is noted that **Pre-Amendment** filed on February 25, 2004 was received. **Claims 3, 5-6 and 10-14 were only amended to delete the improper multiple claim dependency**. It is noted also that USPTO has received two **IDS**' filed on May 25 and July 23, 2004 respectively. **Claims 1-14** with one independent claim (Claim 1) are now pending. An action follows.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-7, drawn to a linear type <u>compound</u> perfluoropolyether having a specific formula (I) as T-O-(CF₂O)_n(CF₂CF₂O)_m(CF₂CF₂CF₂O)_r(CF₂CF₂CF₂O)_s-T₁, classified in class 526, subclass 247.
- II. Claim 8-12, drawn to <u>a process of making</u> a linear type compound perfluoropolyether having formula (I) as $T-(CF_2O)_n(CF_2CF_2O)_m(CF_2CF_2CF_2O)_r(CF_2CF_2CF_2O)_s-T_1$ through peroxidic and then fluorination route, classified in class 525, subclass 387.
- III. Claims 13-14, drawn to <u>the use</u> of a linear type compound perfluoropolyether having formula (I) as T-O-(CF₂O)_n(CF₂CF₂O)_m(CF₂CF₂CF₂O)_r(CF₂CF₂CF₂O)_s-T₁ as luibricants, classified in class 428, subclass 421.

3. The inventions are distinct, each from the others because of the following reasons:

Inventions II and I are related as process of making and product made, while

Inventions I and III are related to a product and its process of using. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

- 4. In a close examination, the <u>process of making</u> in Group II involves the specific peroxidic and then fluorination route. In the instant case the process as claimed can be used to make other and materially different organic or polymeric compounds, the requirement is that the such a starting compound needs to contain the same type of claimed <u>reactive end group(s)</u> so as to react with perfluoropolyether oil.
- 5. Linear type <u>compound</u> of perfluoropolyether of Group I can be prepared by some way, which is other than using the process of Group II. For instance, without using a reactive peroxidic and fluorination route (see prior art cited on page 3 of specification). The process of making is unique and thereby not interchangeable.

In other close examination, the <u>process of using</u> in Group III involves the specific use as a lubricant. In the instant case the process as claimed can be used for other purpose other than lubrication. For instance, it can be used as a reaction medium or as a solvent. The

Art Unit: 1713

requirement is that such a linear type <u>compound</u> perfluoropolyether will not be reacted with others. Therefore, the scope of the claims, i.e., the metes and boundaries are distinct. It is noted that <u>the use claims (Claims 13-14) are improper according to MPEP since steps</u> and/or sequence of using are NOT disclosed.

- 6. Because these inventions are distinct for the reasons given above and the search required for each group is not required for other groups have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 7. It is noted that no phone call was made to **Richard J. Berman (registration # 39,107, tel: 202 857-6000)** by the examiner due to the complexity on multiple (**three**) groups.

 Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communication from the examiner

should be directed to Dr. Henry S. Hu whose telephone number is (571) 272-1103. The

examiner can be reached on Monday through Friday from 9:00 AM -5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Wu, can be reached on (571) 272-1114. The fax number for the organization

where this application or proceeding is assigned is (571) 273-8300 for all regular

communications.
